DIANE MIZRAHI
PRIMARY EXAMINER

Claims 3 and 6 are pending in the present application.

Applicant's request for reconsideration and arguments submitted on 2-20-07 with respect to claims 21-26 have been reconsidered but are not deemed persuasive for the reasons set forth below.

Response to Applicant' Remarks

Examiner has completed a through study of Applicant's request for reconsideration of 2-26-07. *In light of Applicant's remarks/arguments and amendment of 2-26-2007, a new office action is issued below:*

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Examiner is unclear as to what Applicant means by the claimed, "it" (part (b3)) (part (b3a)). Further explanation is required.

Regarding the USC 101, this Official Office Action is in full compliance with USPTO's Guidelines for Examination of Computer Related Inventions and reflects office policy regarding the USC 101 Guidelines. See new rejection below:

Claim Rejections - 35 USC 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title.

Claims 3 and 6 are rejected under 35 U.S.C. 101 because the claims are directed to a non-statutory subject matter, specifically, the claims are not directed towards the final result that is “useful, tangible and concrete.

See State Street, 149 F.3d at 1373-74 USPQ2d at 1601-02 and Alappat, 33 F.3d at 1544, 31 USPQ2d at 1557). The decisions state to be eligible for patent protection, the claimed invention as a whole must accomplish a practical application. A claim limited to a machine or manufacture, which has a practical application, is statutory. Alappat, 33 F.3d at 1544, 31 USPQ2d at 1557). That is, it must produce a “useful, concrete and tangible result”. The purpose of this requirement is to limit patent protection to inventions that possess a certain level of “real world” value as opposed to subject matter that represents nothing more than an idea or concept, or is simply a starting point for future investigation or research (Brenner v. Manson, 383 U.S. 519, 528-36, 148 USPQ 689, 693-96 (1966); In re Fisher, 421 F.3d 1365, 76 USPQ 2d 1255 (Fed. Cir. 2005); In re Ziegler, 992 F.2d 1197, 1200-03, 26 USPQ 2d 1600, 1603-06(Fed. Cir.1993).

Applicant’s claim 6 recites conditional limitations for producing results, such as the claimed, “ if said Rowset was open... if the command... is applicable...”. The result of the

claimed, “to set” is conditional and will take place only the claimed, “if said Rowset was
opened... if the command... is applicable...” .

Regarding Claim 3 the claimed, “fetching...issuing...retrieving....” does not produce a tangible result. There appears to be no generating or production of any useful, concrete, and tangible results.

Regarding Claim 6, the claimed, “fetching...determine... determine...set....” does not produce a tangible result. Examiner recommends that to satisfy the 101 rejection, that the claims must produce a real-world result. Benson, 409 U.S. at 71-72, 175 USPQ at 676-77.

Examiner recommends that to satisfy the 101 rejection, that the claims must produce a real-world result. Benson, 409 U.S. at 71-72, 175 USPQ at 676-77.

Examiner recommends that to satisfy the 101 rejection, and to be “useful”, the claim must satisfy the utility requirement thus the invention has to be specific, substantial and credible. (MPEP 2107 and In re Fisher, 421 F.3d 1365, 76 USPQ 2d 1255 (Fed. Cir. 2005); the claims must produce a real-world result. Benson, 409 U.S. at 71-72, 175 USPQ at 676-77; and that the result that can be substantially repeatable or must substantially produce the same result again. In re Swartz, 232 F.3d 862, 864, 56 USPQ2d 1703, 1704 (Fed. Cir. 2000).

Examiner recommends Applicant to amend the claims without adding any new matter to the originally filed specification.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Comments

The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. In no case may an applicant reply outside the SIX (6) MONTH statutory period or obtain an extension for more than FIVE (5) MONTHS beyond the date for reply set forth in an Office action. A fully responsive reply must be timely filed to avoid abandonment of this application.
